Education

SCTR's Pune Institute of Computer Technology, Pune, Maharashtra — 2025 – 2028 (Present)
B.Tech – Electronics & Telecommunication Engg.

ZES's Zeal Polytechnic, Pune, Maharashtra — 2022 – 2025
Diploma in Computer Engineering — *Score: 93.83%*

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL
Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io
Databases: MySQL, PostgreSQL, MongoDB, Firebase Firestore
Frontend: HTML, CSS, React.js
Cloud & DevOps: AWS, Docker, Git, GitHub, Postman
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, System Design Fundamentals

Projects

HandoffHub — From Project Kickoff to Final Handoff — Oct 2026
React, Node.js, Express.js, MongoDB, Redis, Socket.IO, JWT

- Engineered a full-stack workspace for coordinating **client–developer project delivery**, consolidating requirements, milestones, deliverables, and review feedback into a unified workflow.
- Built a **milestone state-transition workflow** supporting progress tracking, deliverable submissions, approvals, and change requests to structure project reviews and acceptance.
- Designed REST APIs and MongoDB schemas for project metadata and workflow state, integrating **JWT-based session authentication**, access-key verification, and **Redis-backed temporary storage.**
- Integrated **Socket.IO event-driven communication** to synchronize project discussions and participant activity in real time across connected clients

**SafeHouse — A Safer Space for Shared Secrets | ** — Nov 2026
React, Node.js, Express.js, MongoDB, Redis, Socket.io, JWT, Web Crypto API

- Built a full-stack platform for sharing **sensitive .env** variables and private chat in temporary rooms, with **real-time synchronization** using Socket.IO.
- Implemented **ECDH P-256** key agreement and client-side **AES-256-GCM** encryption with unique **96-bit IVs** using the Web Crypto API to protect sensitive environment variables during transmission.
- Designed a split data layer with **24-hour Redis TTLs** for encrypted environment variables and MongoDB for room metadata, ensuring **0 plaintext secrets transmitted to the server** through client-side encryption.
- Implemented **REST endpoints** for room creation, joining, and access control, secured with **6-character room IDs**, bcrypt-hashed access keys (12 rounds), JWT session cookies, and **IP-based rate limiting**.

Achievements

- **Institute First Rank** – Diploma in Computer Engineering (**93.83%**).
- Awarded the **Academic Excellence Award** from ZES's Zeal Polytechnic Pune for exceptional academic performance.
- Solved **150+ problems on LeetCode**, ranked among the **Top 500 students at the institute on GeeksforGeeks**, and achieved a **peak rating of 1400 on CodeChef (DSA)**.

Hackathons & Competitions

- **Track Winner** at the **Build for Billions** National-Level Hackathon, organized by NITK, for developing an innovative solution addressing a real-world problem and presenting a functional prototype.
- Shortlisted among the **Top 12 teams** out of 163+ teams in the **Startup Smackdown Hackathon**.
- Selected among the **Top 100 teams** out of 900+ teams in the **AWS IIT Bombay ImpactX Challenge**, developing innovation-driven solutions with potential social and economic impact.

Positions Of Responsibility

Google Student Ambassador — PING Network

- Promoted Google developer programs and technical initiatives, engaging with **100+ students** through campus outreach and community activities.
